### IMPORTANT INFORMATION

#### WHY AIR BUBBLE APPEARS IN BETWEEN ACRYLIC AND SUBSTRATE (plywood, Mdf, Particle Board) AFTER THE INSTALLATION?

- There are many reasons which lead to air bubble problems are follow as :
- Bonding of Acrylic Sheets under high humidity atmosphere
- Using of water base syrthellaeasin adhesive or other than PVACP (Polyethylene Vinyl Acetate Co-polymer) adhesive may also lead to air bubble after the installation Acrylic Sheets.
- Many of time due to uncertain weather conditions Substrate (Plywood, MDF, Particle Board) absorbed moisture. After few days of installation Acrylic Sheets on substrate, substrate gradually loses moisture. The moisture is the result of air bubble between Acrylic Sheets and substrate after installation.
- Using odd uneven surface Substrate (Plywood, MDF, Particle Board) Lead to debone at particular area of Acrylic Sheets and air bubble appear at that area after the installation.
- When more than 4'X 2' of Acrylic Sheets is used for paneling, it can lead to air bubble after installation.
- Lack of pressing and short period of pressing at the time of bonding period of Acrylic Sheets also lead to air bubble after the installation of Acrylic laminate.

GLOIRIO Acrylic Sheets should be kept evenly Straight. if the sheets are in roll form it Should kept straight for minimum 48 hours and then you can press and laminate on the surface for better results.

#### WHY YELLOW PATCHES AND COLOUR FADE PROBLEM APPEARS AFTER THE INSTALLATION OF ACRYLIC SHEETS?

The reason behind this problem is as follows :

- When Acrylic Sheets experiences or faces direct fall of sunlight on it which leads to discolouring, fading and yellowness in laminate.
- Using of inferior quality or not as per standard quality dipped plywood & dipped lipping patti may lose the colour due to chemical reaction between adhesive at the time of bonding period and yellow patches appear after the installation.
- Using synthetic rubber adhesive (SR / JatPat, Bostic, Heatex) lead to colour patches on Acrylic Sheets.
- Prolonged exposure temperature above 30° cor placing hot cookware directly on the Acrylic Sheets cause patches on Acrylic Sheets surface.
